

We've got performance covered
FROM THE INSIDE OUT.

Protect your homes with the exceptional weather- and water-resistance of HardieWrap® weather barrier.

No exterior cladding can prevent 100% of water intrusion. Your homes should have an additional line of defense. Our weather barrier provides a superior balance of water resistance and breathability, keeping the area within the wall drier, helping to prevent moisture accumulations that may lead to mold and mildew growth.

Siding | Trim

THE COMPLETE SOLUTION

ENGINEERED FOR CLIMATE®

An optimal balance between permeability and water or air resistance is essential, and HardieWrap® weather barrier achieves those goals. Like our siding and trim, HardieWrap weather barrier is Engineered for Climate® with water vapor permeability optimized for distinct climate zones. Our weather barrier also features Microtech™ coating, which provides excellent wind and water resistance. This technology combination helps keep wall cavities dry to avoid conditions that support mold and mildew.

	HardieWrap® Weather Barrier - Colder Climates	HardieWrap® Weather Barrier - Warmer Climates
TRAPEZOIDAL TEAR (ASTM D-4533 – lbs)	18/15 lbs	18/15 lbs
AIR RESISTANCE (TAPPI T-460 – sec/cc)	>1800sec/100cc	>1800sec/100cc
WATER HOLDOUT (AATCC-127 – cm)	325 cm	325 cm
WATER VAPOR PERMEABILITY (ASTM E-96A – perms)	25 perms	15 perms

SINGLE SOURCE WARRANTY

HardieWrap weather barrier comes with a 10-year limited transferable product warranty. Install it beneath James Hardie® siding and trim for exceptional warranties from a single, trusted manufacturer.

INSTALLATION ADVANTAGES

- Thicker, more durable material means less tearing and fewer entry points for water
- Allows staples in place of cap nails for cost savings
- An excellent choice for use with all types of cladding
